Professional design , Safety and Stability

The top leading structural design has passed the relevant certifications. With high loading capacity, and perfect anti-seismic & wind resistant performance, it ensures the safety and stability in use.

Aneasy Demountable Bleacher Seating System consists of Main Supporting System, Seating System, Aisle System and Safeguard System. It is widely applicable in sporting events, theatrical performance, meeting and other activities for temporary use.

- The structure of the system is tested and approved by international professional institutions
- Factory modular production makes the on-site work very easy and quick, and the heavy machines are not required
- All the metal components are hot-galvanized with weather resistance
- Professional engineering team, installation and maintenance team with high quality service
- It is widely used in the international top events: Unversiad Games, F1 Grand prix, International Equestrian Championships and etc.,

Structural supporting

The special design of the connect fittings is flexible to meet all the different requirements at the job site. The main support is made of high strength steel with high loading capacity. All the metal components are anti-rust and anti-corrosion with surface hot-galvanized.

It meets the National Building Standard. Steps and slopes can be chosen from according to clients requirements.

Staircase

Guardrail

The guardrails and relative accessories are produced strictly according to the National Safety Standard with high strength and stability.

Aisle Decking

The aisle and decking is made of galvanized steel with anti-slip surfacing and high load strength.
